About Us

We are young group of engineers who are highly interested in renewables sources of power generation. Solis Green Energy Solutions was born out of compassion for green and clean environment and the zeal to find solutions for power crisis in India. We also aim for an overall development of rural community. The demand for energy is rising with the rapid increase of Indian population. Moreover, most of the rural belts of India have inadequate, minimal or no electricity, which by the way is a vital ingredient in the development of any community. We are focusing on solar energy, one of the best options in green renewable energy, to provide sustainable and economical power supply to the community and thus make world a better place to live in.

Why Us?

-  100% Shadow Free Installation.
-  High Quality Branded Equipment.
-  Efficient Government Liaisoning Services.
-  Optimized Electrical & Civil Structure Design.
-  Energy Efficient & Cost Effective Solution.
-  Warranty & Maintenance Support.

Engineering Procurement And Construction

To ensure quality of the project, we produce QA/QC documents required at each activity, for close supervision and maintaining the necessary compliance for project records. These QA Plan documents show how the company defines, selects, implements and assures quality during survey, design, procurement, erection, installation and commissioning process.

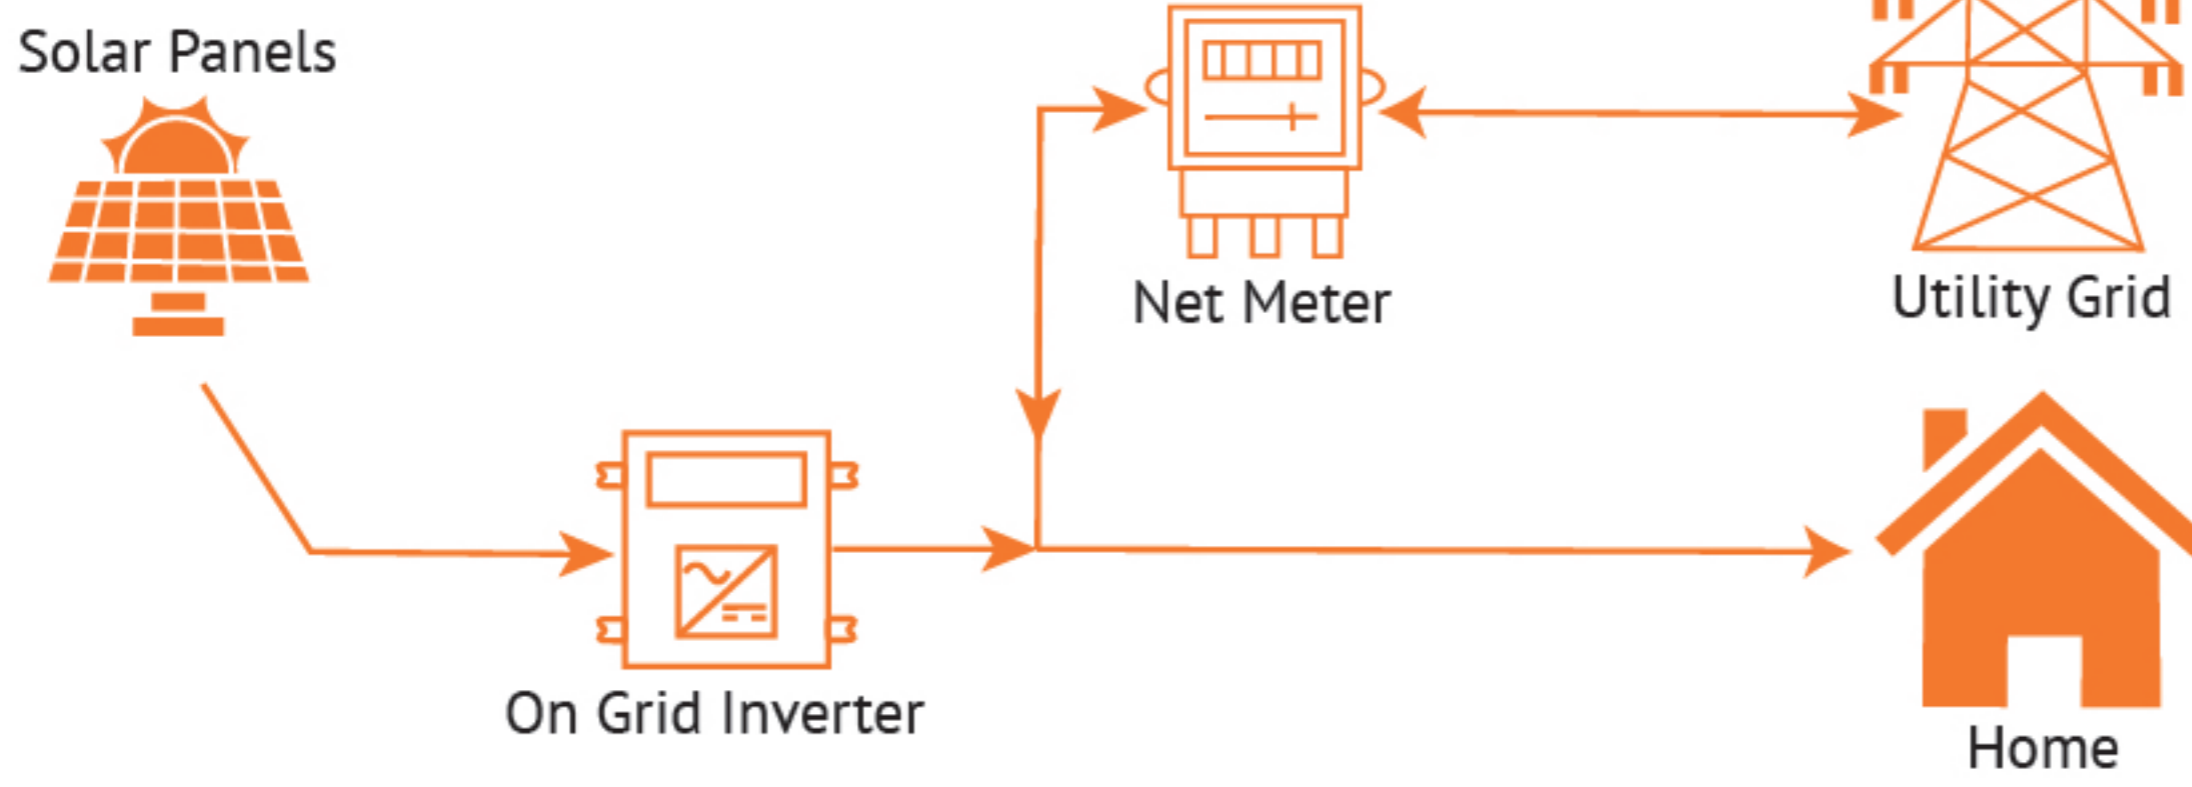

Our dedicated Quality Assurance Team independently deals with matters related to Quality for all the products and services offered.

Project Work Flow

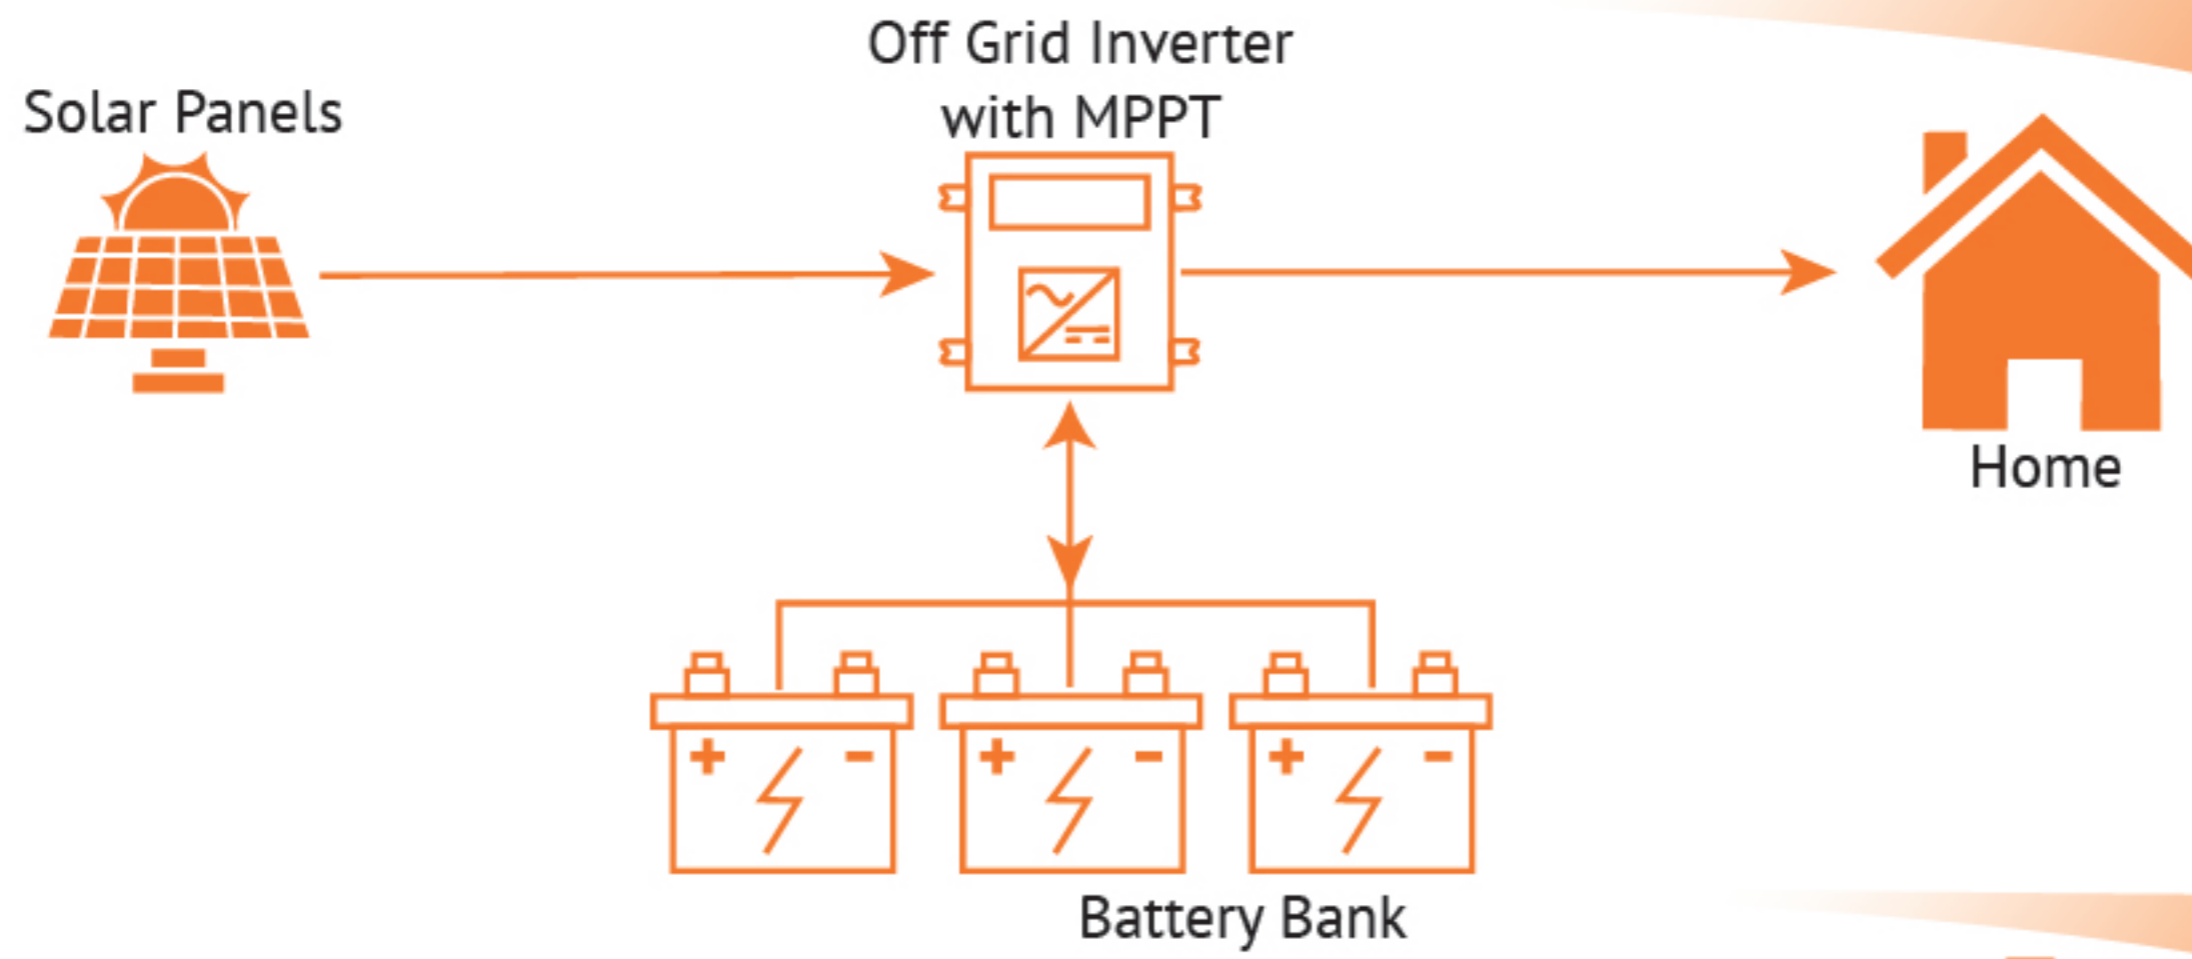

Varieties of PV - Systems

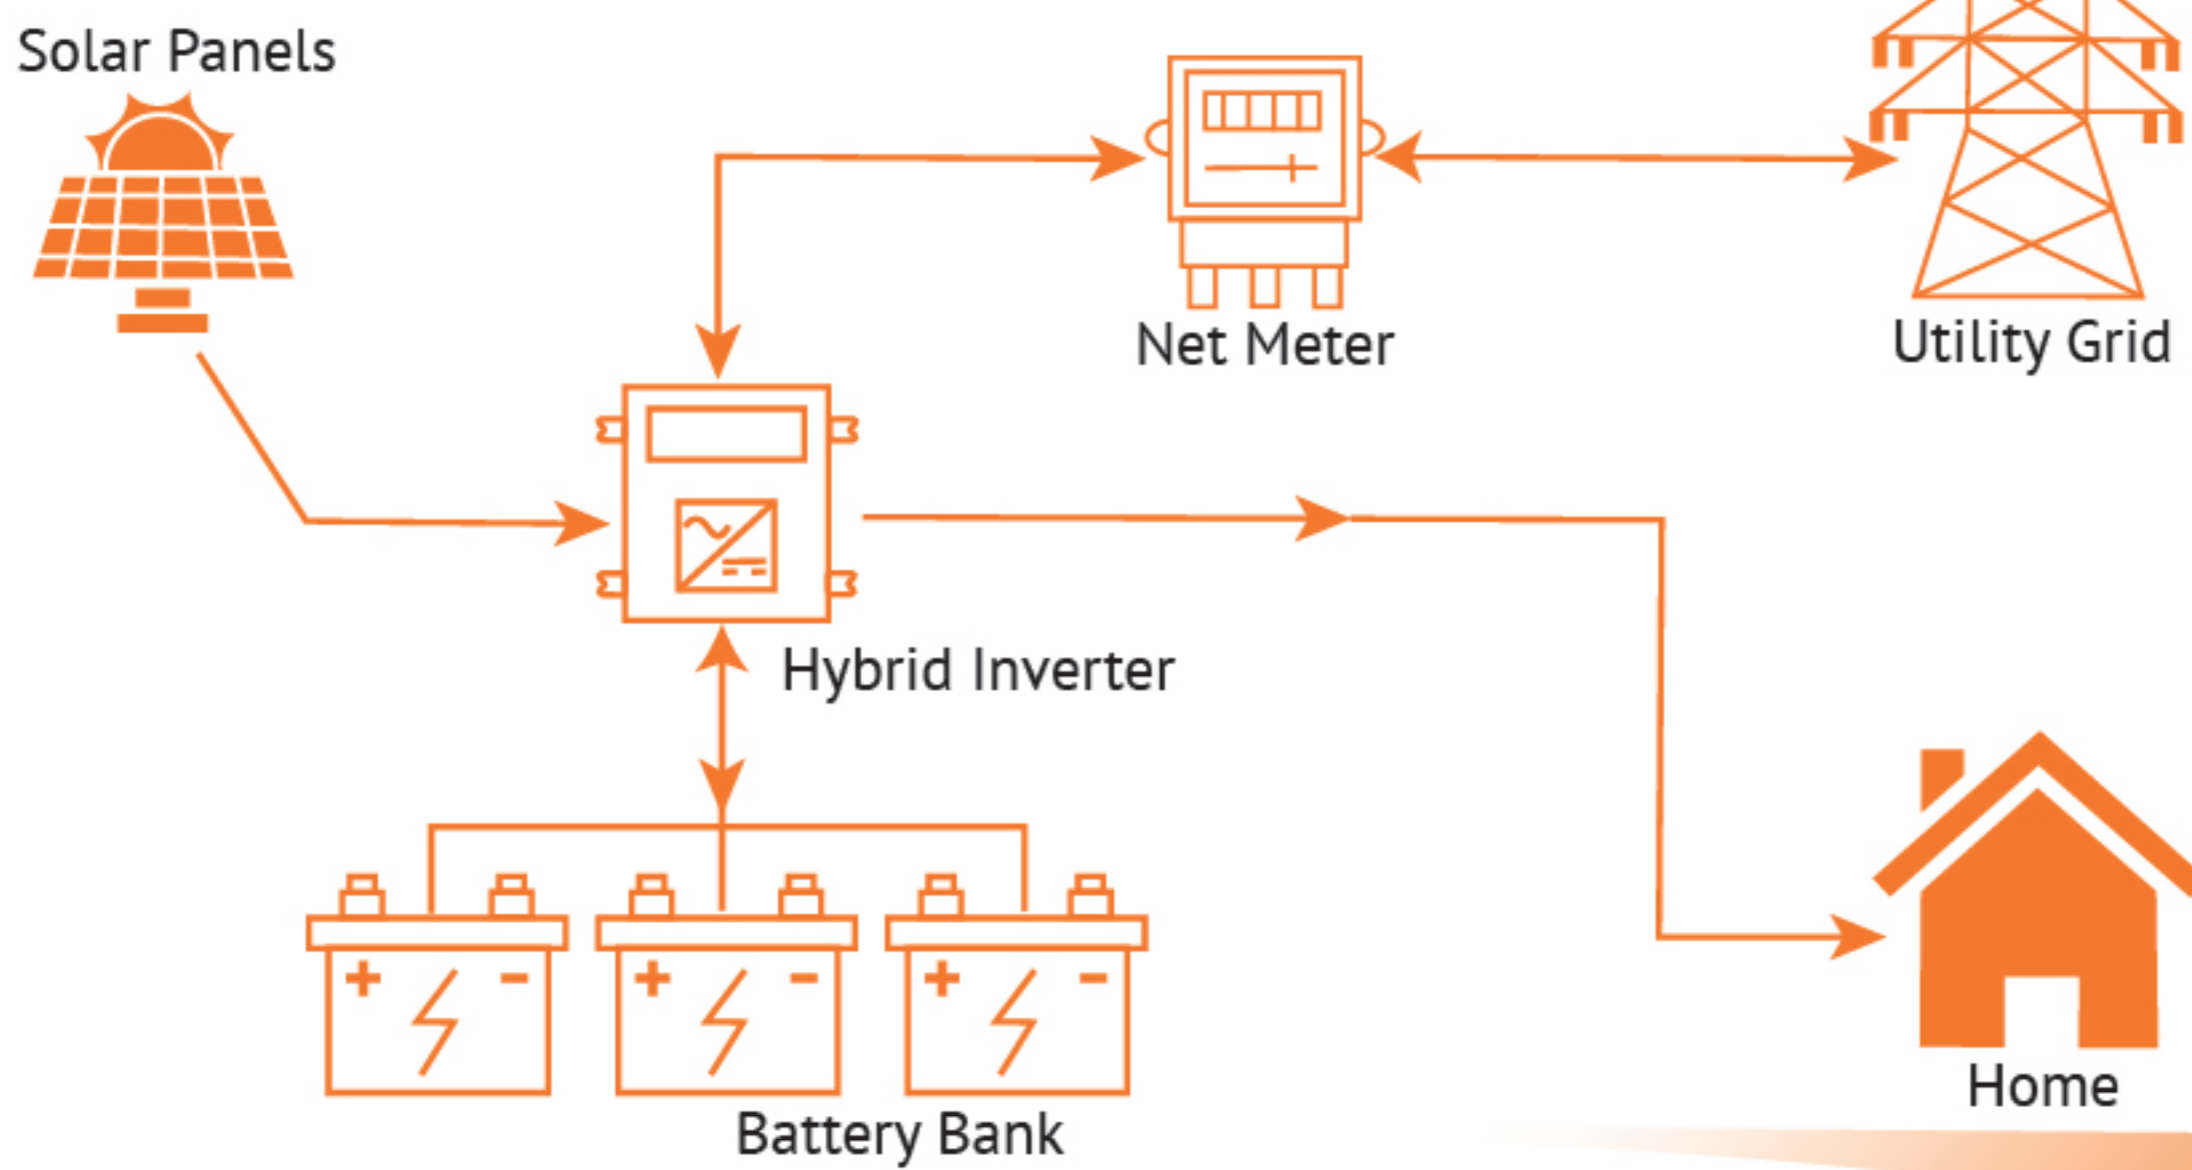

On-Grid System

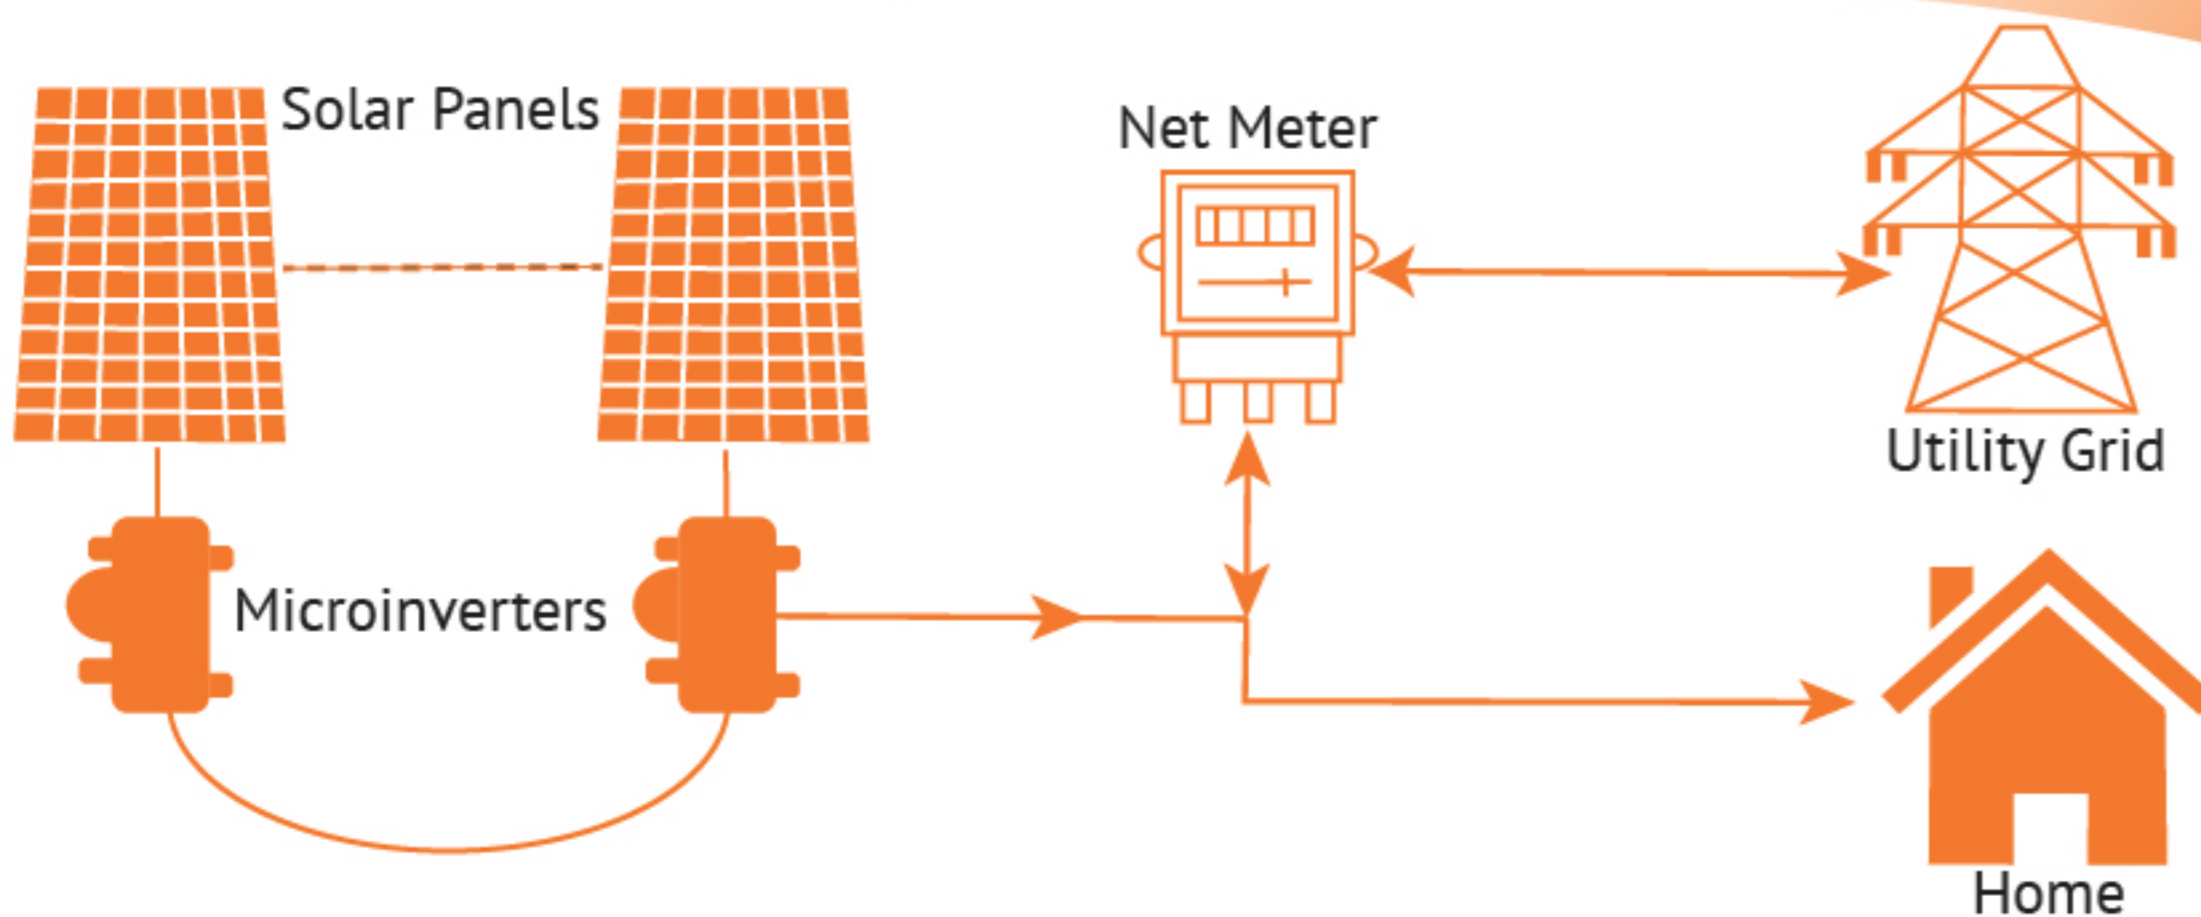

Off-Grid System

Hybrid System

Microinverter System

Technical Team

With skilled workforce we are focused on delivering quality with excellence and innovative & futuristic energy solutions for customer. Our technical teams consist of professional and passionate engineers through their technology-agnostic approach allows to focus on customer expectations and function as real-time problem solvers. The promoters at Solis have a wealth of experience and expertise in solar feasibility, financial models, installation procedures, and maintenance.
